SSI Continuing Education

Navigation Diving

Sick of following your dive leader around, staring at their fins, thinking “Where am I?”

Good underwater navigation skills can stop a perfect dive from turning into a 400m snorkel back to a boat or shot line. The use of a compass underwater is certainly not the easiest of tasks but with the right training, you could be hitting the right spot every time.

Whether using a compass or their natural surroundings, scuba divers can learn to master their marine environment through the skills of navigation. The ability to navigate into fascinating, new destinations increasing the diving adventure and your confidence.

- **Natural navigation**
- **Compass navigation**
- **Combining natural & compass navigation**
- **Special navigation situations**
- **The sport of navigation**
- **In-depth information on the necessary equipment and its care**
