

Exploring Beyond the Surface

SSI Continuing Education

Night/ Limited Visibility Diving

Whether it's day or night, limited visibility can be an adventure. Just because the visibility is limited, doesn't mean the opportunities are. The colourful nocturnal creatures glowing under a dive light create a spectacular, surreal combination. Open your eyes to the wonders of the nocturnal marine environment. 90% of the world's marine population is nocturnal, why wouldn't you want to take advantage of the fantastic diving to be had?

- **Setting up shore lights at night**
- **Having fun in turbid water**
- **Holding lights to maximize visibility**
- **Locating the boat or shore**
- **What to do if you lose sight of your buddy**
- **What to do if your light goes out**
- **In-depth information about necessary equipment, its care and maintenance**

Your Night/ Limited Visibility diving course consists of 1 Theory session and 2 shore/pier based dives
